SUMMARY

Game developer with two solo-shipped titles (Roblox and Google Play) and studio experience at Mega Cat Studios designing game UI in Figma and implementing it in Unity. Strong in C# gameplay systems, enemy AI and game UI, backed by 3D art and graphic design skills that let me take features from mockup to in-engine.

EXPERIENCE

UI/UX Intern — Game Artist Department · Mega Cat Studios Jan 2026 – Jul 2026
Internship via FEU Alabang · Worked across three projects; names and details withheld under NDA

- Designed game UI screens and components in Figma and implemented them in Unity across three projects.
- Built animated UI with Unity's Animator — state-based intro/loop sequences, slide-ins and transitions.
- Fixed responsive layout issues (RectTransform, Content Size Fitter, Layout Groups) so UI scales cleanly across resolutions.
- Kept UI hierarchies on team naming conventions and documented implementation decisions in team updates and ADRs.

SHIPPED GAMES

Junkyard Prison · **Roblox** · **Solo** Play on Roblox · 2026

- Simulator where players hand-sort a 100,000-piece physical landfill to escape, with six upgradeable tools.
- Server-authoritative Luau architecture; 100,000-bit save map across three slots; physics budget that keeps every item rendered.
- Modelled assets in Blender, wrote tutorial and NPC dialogue, and set up game passes and dev products.

Rotoblocks · **Android** · **Solo** Google Play · 2026

- Swipe-to-match puzzle game where the board rotates 90° after every clear, triggering cascades and combo chains.
- Programmed grid, matching and chain systems in Unity/C#; built progression, daily goals, achievements and six block skins; handled Play Store release and updates.

PROJECTS

- **MinaTamis** — 3D Filipino dessert simulator, PC (Capstone, 2025) · *Co-Programmer*: cooking mechanics, NPC AI and pathfinding, day-night cycle, UI.
- **Isolation Protocol** — Sci-fi mobile FPS (2025) · *Lead Developer*: all gameplay mechanics, mobile controls, enemies and boss unlock.
- **Lucid Dreams** — Surreal 3D physics adventure, PC (2025) · *AI & Gameplay Programmer*: enemy AI, player movement, animation trees, UI.
- **Galactic Force** & **Bricks** — Arcade shooter and brick breaker on itch.io (2024) · enemy waves, physics, power-ups, UI.

SKILLS

Engines & Languages: Unity, C#, Roblox Studio (Luau), C++, Python, JavaScript, Java, PHP, CSS

Game Dev: Gameplay systems, enemy AI & pathfinding, game UI integration (uGUI, Layout Groups, Animator), mobile controls, store release

Design & Art: Figma, Photoshop, Illustrator, After Effects, Premiere Pro, DaVinci Resolve, Lightroom, Maya, Blender, Aseprite

EDUCATION

BS Information Technology — Animation & Game Development
FEU Alabang, Muntinlupa · Expected 2026

CERTIFICATIONS

TOPCIT — Level 3 (Test of Practical Competency in IT)
Maya Certified User — 2025 · Cisco Networking — 2024

LEADERSHIP

President & Founder — SP3 Racket Club (badminton), Bacoor
Member — Junior Philippine Computer Society, 2024 – Present
